Individual Assessment

- Explain your responsibilities in the team. Did you fulfill all your responsibilities?
  Luis: Servidor y Base de datos con Firebase, Go y Javascript
  Jorge y Mario: CSS, HTML, Javascript

- Grade (1-10) your work according to your responsibilities, effort and collaboration with the team. Explain.
  I implemented the server and the database.
  Mario helped me to give structure to the project
  Jorge was responsible for the design of the page

- What person did the best work in your team? Explain.
  I implemented the server and the database.
  Jorge and Mario developed the front end and helped us connect and they also made the investigation. So we all did the best in our area

- What team did the best product? Rank all the projects.
  Help Meowt!
  Zoológico
  Guera
  Guess it
  Where's Benito?
  Medicina

- Explain what did you learn working on the project.
  Learn how to implement firebase in a web service and connect it with a go server
- Evaluate the members of your team from 1 to 10.
  Mario 9.5
  Jorge 9.5

- Grade your project (1-10). Explain.
  It was a huge challenge, because Golang doesn't have dynamic variables, so we have to specify everything because it won't change in runtime, also, learnt how to implement firebase with javascript. It wasn't hard to me because I had already worked with Firebase. At first we tried to do it in Golang but it was just for Administrator user and we wanted users to send data, so we changed it to Javascript when we knew Golang won't do what we want.

  So I think we deserve a 100 because we learnt from scratch and we made it work.
